SUMMARY

Cybersecurity-focused Computer Science student with growing expertise in AI/ML integration. Experienced in building AI-powered security tools — combining threat intelligence, malware analysis, and LLM-based automation. Passionate about applying cybersecurity knowledge alongside AI capabilities to build intelligent, secure systems. Quick learner with strong hands-on project experience and published research.

EDUCATION

BE. Computer Science & Engineering (Cybersecurity), Sri Shakthi Institute of Engineering and Technology CGPA - 7.8*	2023 – 2027 Coimbatore,Tamilnadu
HSC, St Joseph Matric. Hr.sec.School 86%	2022 – 2023 Madurai,Tamilnadu
SSLC, St Joseph Matric.Hr.Sec.School 100%	2019 – 2020 Madurai,Tamilnadu

SKILLS

Programming & Databases Python, Java, React, JavaScript, C, MySQL, MongoDB	Tools Wireshark, Kali Linux, VirtualBox, Azure, Linux CLI, Git, GitHub,
Technical Cybersecurity Threat Intelligence, Phishing Detection, Penetration Testing Vulnerability Assessment, Network Security, DevOps & DevSecOps	Soft Leadership, Organizing, Communication, Time Management, Adaptability
AI/ML & Development LLM Integration, Prompt Engineering, Agent Loop Design, Ollama, MySQL, MongoDB	

PROJECTS

PlacementMentorAI — AI-Based Placement Prediction & Career Guidance System, Sri Shakthi Institute Of Engineering And Technology, Coimbatore Developed an AI-powered student placement prediction system using Machine Learning to generate placement scores, eligibility status, and career recommendations. Built an interview behaviour analysis module using YOLO11-Pose to classify candidates as Confident, Nervous, or Distracted from images and mock interview videos. Integrated Flask-based web application with Dockerized deployment support for scalable and cloud-ready execution. Tech Stack: Python, Flask, Scikit-learn, Random Forest, YOLO11-Pose, OpenCV, PyTorch, Pandas, NumPy, Docker, AWS EC2	05/2026
URLs Threat Identification Dashboard – Python, Threat-Intel APIs, Sri Shakthi Institute Of Engineering And Technology, Coimbatore Developed a real-time dashboard that collects, parses, and visualizes malicious URLs using threat intelligence feeds like URLHaus and AbuseIPDB. Implemented automated reporting for faster detection and monitoring. Tech Stack: Python, Flask, YARA	05/2025

CERTIFICATIONS & WORKSHOPS

Linux 100: Fundamentals - TCM Security	Network Mastery for Ethical Hackers - Udemy	Offensive Security Certified Professional - Online Nativeva - Dec, 2025
Cyber Forensic Investigator Webminar - Online Nativeva - Dec, 2025	Cybersecurity Analyst – Virtual Internship Tata Consultancy Services (Forage)	Microsoft AI Fundamentals
